

JBC CLMS-B

Junior Tip Cleaner

[Ask for a demo](#)

Search ▼

This automatic cleaner improves thermal transfer of the tip in only 1 second, which means you save time and optimize production.

The operator just needs to press the button of the opening with the tool and two motorized brushes will clean the tip. It is also possible to select the continuous mode.

The splashguard helps keep the bench always clean and free of Foreign Object Debris (FOD).

The CLMS-B can be fitted into any work area thanks to its reduced size and it is very easy to maintain. The solder collector tray can be emptied and re-used with no wear and tear.
